March 29, 2012

To: The Planning Commission

Re: Comments on the Draft SMP

Attached is a petition containing just short of 1000 signatures of shoreline property owners. This number of signatures represents a large proportion of the shoreline property taxpayers and voters. The views of the signatories should be considered seriously and thoughtfully. The petition simply urges the city to adopt a Shoreline Master Program that follows state laws while protecting the environment and citizen's shoreline property rights.

The issues in the petition are addressed below. **The Draft SMP is in blue. The language in red is consistent with the statements in the petition.**

- 1. The SMP update must declare existing, lawfully built homes to be “conforming” structures as per SSB 5451.**

4.2.1.2 Goal: Nonconforming Development

It is the purpose of this program to recognize legally established primary residential structures, and to allow them to be maintained, repaired, remodeled, replaced and in some cases expanded in conformance with these rules. Residential structures that do not conform to this program should, over time as the owner proposes changes to the structure, conform as completely as possible to this program, with due regard to unique site conditions and property rights.

4.2.1.3 Policies

- 1. Lawfully constructed residential structures shall be allowed to be repaired, maintained, expanded, or remodeled provided that the expansion does not increase the nonconformity.**

RCW 90.58.100 The Shoreline Management Act (SMA) states that shoreline modification is to be expected and requires a balance of private property rights with ecological protection.

The SMA also lists “single family residences with their appurtenant structures” as the first of the State’s priority uses of its shorelines.

Senate Bill 5451 was passed by the legislature and signed into law by the governor. It states that local jurisdictions **may** declare existing, lawfully built homes and their “appurtenant structures” to be conforming in updated Shoreline Master Programs. (“Appurtenant structures”

are defined as garages, sheds, and other legally established structures, but they do not include bulkheads and other shoreline modifications or over-water structures.)

Since “no net loss of ecological function” starts on the day the SMP update takes effect, existing structures— including bulkheads and docks — cannot cause a loss.

Changes that would be consistent with the petition:

- Explicitly state that existing, lawfully built homes are conforming.
- Remove all references to non-conforming in the policies and regulations.
- Allow existing, lawfully built residential structures to be expanded with proportional mitigation if the expansion is within the shoreline buffer.

2. Any New regulations, including vegetation buffers, must apply to future development only. .

4.1.3.4 Vegetation Management Regulations—Exceptions

1. Vegetation management standards shall not apply retroactively to existing legally established uses and developments, including maintenance of existing residential landscaping, such as lawns and gardens. Property owners are strongly encouraged to voluntarily improve shoreline vegetation conditions over the long term.
2. The City shall recognize and adhere to existing buffers and setbacks that have been established through previously approved subdivisions and are indicated on the face of an approved plat.

4.1.3.4 Vegetation Management Regulations-Exceptions

1. Vegetation management standards shall not apply retroactively to existing legally established uses and developments, including maintenance of existing residential landscaping such as lawns and gardens. Property owners are strongly encouraged to voluntarily improve shoreline vegetation conditions, including the use of natives over the long term.
2. The City shall recognize and adhere to existing buffers and setbacks that were approved in the 1997 SMP.
3. **Shoreline armoring regulations must balance the need to protect private property from erosion with the positive effects of onsite mitigation or participation in restoration programs at other locations in the city.**

6.2.3.4. Shoreline Stabilization Policies.

Structural shoreline stabilization should be permitted only when it has been demonstrated that shoreline stabilization is necessary for the protection of existing legally established structures, primary uses or public improvements in danger of loss, and when it can be demonstrated that there are no alternative options to the proposed shoreline stabilization that have less impact on the shoreline environment.

Residential uses are a preferred use under the DOE Guidelines. Regulations should allow for property owners to take necessary and reasonable steps for the protection of property surrounding an existing, lawfully built residential structure.

6.2.7 Regulations - Repair of Existing Structural Stabilization

1. The City shall allow repair of soft-treatment stabilization.
2. Repair of existing structural stabilization shall be allowed when:
 - a. Failing, damaged structural stabilization may be repaired up to 50% of the linear length. Repair area that exceeds 50% shall be considered a replacement.
 - b. Repairs may require mitigation pursuant to Section 4.1.2, Environmental Impacts.
 - c. Repair applications shall be considered with cumulative approvals of each successive application within a five year period to ensure that the repair continues to fall under the 50% repair threshold.

6.2.7 Regulations - Repair of Existing Structural Stabilization

1. The City shall allow for all necessary and reasonable actions to repair the existing stabilization for existing, lawfully built residential properties.
2. The City may require mitigation if a repair causes a net loss of ecological function. The burden of proof is on the City to demonstrate this net loss.

6.2.8 Regulations – New or Replacement Structural Stabilization

1. When evaluating the need for new, expanded or replacement structural stabilization measures, the Administrator shall require the applicant to provide an analysis that examines and implements alternatives in the following ~~order of preference sequence~~:
4. Any measure of “cumulative impacts” must account for restoration and mitigation projects undertaken by individuals, nonprofits and government entities.

and
5. New regulations must fairly allocate the burden of addressing “cumulative impacts” of predicted future development.

WAC 173-26-201 (3)(d)(E)(iii) states, “The principles that regulation of development shall achieve no net loss of ecological function requires that master program policies and regulations address the cumulative impacts on shoreline ecological functions that would result from future shoreline development and uses that are reasonably foreseeable from proposed master programs....”

- 4.1.2.3.4 In assessing the potential for new uses, activities and developments to cause adverse impacts, the City should take into account all of the following:
- a. Effects on ecological functions and ecosystem processes; and
 - b. Effects that occur on-site and effects that may occur off-site; and
 - c. Immediate effects and long-term effects; and
 - d. Direct effects and indirect effects of the project; and
 - e. Individual effects of the project and the incremental or cumulative effects resulting from the project added to other past, present, and reasonably foreseeable future actions; and

- f. Compensatory mitigation actions that offset adverse impacts of the development action and/or use.
- g. Any assessment of cumulative impact will take into account restoration and mitigation accomplished by individuals, nonprofits and government and quasi-governmental entities.

6. Except in Aquatic Conservancy Areas, docks and floats must be permitted if they follow WDFW and Army Corps of Engineers specifications.

6.3.1 Applicability

Uses which may employ a pier or dock are subject to the provisions herein as well as to the provisions contained in Section 5.0, Specific Shoreline Use Policies and Regulations. Community or joint-use docks which provide moorage for six (6) or more vessels also must comply with the provisions of Section 5.3, Boating Facilities. Pursuant to RCW 90.58.030(3)(e)(vii), and its successor, and WAC 173-27-040(2)(h), and its successor, certain activities are exempt from obtaining a Shoreline Substantial Development Permit (SSDP). For the benefit of the lot owner, surrounding properties, and water body users, the City will review all proposals for piers and docks to determine whether:

1. The proposal is or is not exempt from the requirements for a shoreline permit;
2. The proposal is suitably located and designed and that all potential impacts have been recognized and mitigated; and
3. The proposal is consistent with the intent, policies, and regulations of the Act [RCW90.58.140(1) or its successor] and this program.
4. A proposal that is consistent with WDFW and Army Corps of Engineers specifications shall be permitted. Upon a documented showing by the city that specific characteristics are present on a property, (a list of specific characteristics would be inserted here based on the Herrera recommendations,) certain conditions may be required. The property owner may challenge the documentation by retaining a licensed professional in an applicable marine discipline. In the event of a disagreement between the city and the applicant, a mutually acceptable neutral third party may be retained. The losing party must pay for all consultants.

7. Encourage the State of Washington to establish a senior level, peer review panel of scientists, separate from the DOE to assist the City in the preparation of future SMP Updates.

Qualifications must include individuals who are currently active in marine shoreline disciplines who have an appropriate and relevant Masters degree or better from an accredited university. Any research used to support policies or regulations of the SMP must be salt-water based, relevant to Puget Sound and properly peer-reviewed.

8. Properties containing existing, lawfully built residential structures may not be included in a "Shoreline Residential Conservancy" designation without the Property Owner's consent.

Omit the Zone 1 and Zone 2 management scheme. It adds unnecessary complexity to Draft SMP and will be confusing to property owners and code enforcement personnel. Just enforce existing buffer distances as shown below.

Studies used to support larger buffers were in fresh water streams and agricultural conditions. There is not credible support for increasing current SMP buffers. Current SMP buffers support the no net loss standard.

Table 4-3 16.xx.xxx Shoreline Buffer Standards Table

Existing Distances from shoreline to Primary Residential Structures	Proposed SMP Draft Buffer (encompasses RPZ and MPZ) Distance from OHWM	Petition Buffers (Current SMP Buffer unless otherwise noted)- Distance from OHWM
Urban Median 20.1 feet	25-30 feet	25 feet
Shoreline Residential Median 60.2 feet	Category A: lots with 65% Canopy Area in Zone 1, OR spit/barrier/backshore, marsh lagoon, or bedrock. Category B: lots with a depth < 200' or High Bank. 1. For High bank properties the greater distance of 50' from the top of the bluff or the standard shoreline buffer. 2. If adjacent to the Priority Aquatic district then 150' is required. Additional Use restrictions for BIMC Titles 17 and 18 may apply 50-75 feet	50 feet
Residential Conservancy Note: This category does not exist in the current SMP	75-150 feet	This environmental designation will not pertain to any existing, lawfully built residential structures or appurtenances. Or Eliminate this category so all residential areas are designated Shoreline Residential.

Respectfully submitted by the Board of Directors
Bainbridge Shoreline Homeowners

We hereby petition the City of Bainbridge Island Planning Commission and City Council.

As shoreline homeowners, we urge our City's Planning Commission and City Council to adopt a Shoreline Master Program that follows state law while protecting the environment and our property rights.¹

Specifically, we ask that...

1. The SMP Update must declare existing, lawfully built homes to be "conforming" structures as per SSB 5451.²
2. Any new regulations, including vegetation buffers, must apply to future development only, as per state SMP guidelines.³
3. Shoreline armoring regulations must balance one's need to protect private property from erosion with the positive effects of onsite mitigation or participation in restoration programs at other locations in the City.⁴
4. Any measure of "cumulative impacts" must account for restoration and mitigation projects undertaken by individuals, nonprofits and government entities.⁵
5. New regulations must fairly allocate the burden of addressing "cumulative impacts" of predicted future development.⁶
6. Except in aquatic conservancy areas, docks and floats must be permitted if they follow US Army Corps of Engineers specifications.
7. The City Council must encourage the State of Washington to establish a senior level, peer review panel of scientists, separate from the Dept. of Ecology, to assist local jurisdictions in the preparation of future SMP updates.
8. Properties containing existing, lawfully built residential structures must not be included in a "shoreline residential conservancy" designation since state law clearly states that new regulations are intended to apply to future development and changes in land use.⁷

¹ **The SMP must be consistent with constitutional limitations on the regulation of private property.**

Regarding "no net loss" of ecological function, WAC 173-26-186 (8)(b)(i) says, "Local master programs shall include regulations and mitigation standards ensuring that each permitted development will not cause a net loss of ecological functions of the shoreline; local government shall design and implement such regulations and mitigation standards in a manner consistent with all relevant constitutional and other legal limitations on the regulation of private property."

² **Local jurisdictions can declare existing homes to be "conforming" in their SMP updates.**

... as per Senate Bill SB 5451, signed May 12, 2011 by Governor Gregoire.

³ **New vegetation buffers don't apply to existing homes.**

The Department of Ecology's shoreline master program guidelines explicitly state that vegetation conservation standards do not apply retroactively to existing uses and structures. The Washington Administrative Code or WAC 173-26-221(5)(a) says, "...Like other master program provisions, vegetation conservation standards do not apply retroactively to existing uses and structures."

⁴ **"No net loss" must be measured for our entire community, not individual development projects.**

WAC 173-26-186 (8)(b)(ii) says, "Local master programs shall include regulations ensuring that exempt development in the aggregate will not cause a net loss of ecological functions of the shoreline."

⁵ Policies and regulations must consider “cumulative impact” when addressing future development, not existing development.

WAC 173-26-186 (8)(d) “Local master programs shall evaluate and consider cumulative impacts of reasonably foreseeable future development on shoreline ecological functions and other shoreline functions fostered by the policy goals of the Act.

WAC 173-26-201 (3)(d)(E)(iii) says, “The principles that regulation of development shall achieve no net loss of ecological function requires that master program policies and regulations address the cumulative impacts on shoreline ecological functions that would result from future shoreline development and uses that are reasonably foreseeable from proposed master programs....”

⁶ Policies and regulations must fairly allocate the burden of addressing “cumulative impacts.”

WAC 173-26-186 (8)(d) “To ensure no net loss... master programs shall contain policies, programs, and regulations that address adverse cumulative impacts and fairly allocate the burden of addressing cumulative impacts among development opportunities.

⁷ Shoreline master programs are intended to affect future development and changes in land use.

Regarding general SMP contents, WAC 173-26-191(2)(a)(iii)(A) says, “...While the master program is a comprehensive use regulation applicable to all land and water areas within the jurisdiction described in the act, its effect is generally on future development and changes in land use.

The same section goes on to say, “Local government may find it necessary to regulate existing uses to avoid severe harm to public health and safety or the environment and in doing so should be cognizant of constitutional and other legal limitations on the regulation of private property.”
